

Therapeutic Ultrasound

Ultrasound therapy uses a gentle, deep heat to increase blood flow and tissue extensibility, while reducing pain and inflammation. This device can also be used in a non-heat method to create a therapeutic effect on biologic tissues.

Therapeutic ultrasound may benefit in the treatment of:

- Tendonitis
- Muscle spasms
- Joint stiffness
- Arthritis
- Contractures
- Slow healing wounds

By:

- Helping manage pain
- Increasing local circulation to assist healing
- Increasing movements and flexibility in stiff muscles and joints

We offer:

- Complex medical care
- Intensive rehabilitation
- Skilled nursing
